

B'SURE IS BASED ON THE STATE OF THE ART IODINATED RESIN TECHNOLOGY

Iodinated resins today are globally used for drinking water purification to eliminate disease causing bacteria and viruses on contact. Thus with B'SURE you have protection against waterborne diseases, viz. Gastroenteritis, Typhoid, Cholera, Diarrhoea, Dysentery, etc

The B'SURE Drinking Water Purification System has.

- **Filter:** A special fiber filter which traps floating suspended particles.
- **Purifies with IRT:** B'SURE protects you from waterborne diseases like Gastroenteritis, Typhoid, Cholera, Diarrhoea, Dysentery, etc. by its iodinated resin which eliminates all disease causing micro-organisms on contact.

The Working :

- ★ B'SURE Purification System gives you 8,000 liters of purified water.
- ★ B'SURE has a unique self cleaning system which keeps the Iodinated resin free of dirt and muck thereby assuring 100% efficiency till the last drop.
- ★ The Red and Yellow indicator will help you to find out when B'SURE life is exhausted. When yellow portion disappears and only the red portion is visible it is time to buy new B'SURE.
- ★ B'SURE does not require electricity.
- ★ You also do not require to boil the water

Product Specifications :

- **Dimensions :** ◆ Height = 100 mm ◆ Diameter = 50 mm
- **Life :** 8000 liters ◆ Operational Flow: 1 Liter / Minute
